INVENTION DISCLOSURE

Name of Inventor(s): Dr. David Martinez

Address: 234 Innovation Drive, Los Angeles, CA 90001, USA

Telephone: (555)-423-8023

Fax: (555)-444-8011

E-mail: davidmartinezdm@gmail.com

Name of Invention: AquaHarvest – Water Purification and Harvesting System

Brief Description:

AquaHarvest is a water purification and harvesting system that uses parts and steps to purify and harvest water.

Details of the Invention:

The parts of the invention in its best form include a water purification system, a harvesting system, and a combination of the two. The water purification system is new to this invention, while the harvesting system is conventional and used in the expected way. The parts interact to make the invention work by purifying and harvesting water. Each part is essential to the invention, as if any part were left out or changed, the remaining device would not be the invention.

Alternatives

Structural Alternatives:

Structural alternatives for the invention include changing the parts or substituting equivalent parts without changing the basic invention, using a generic description for

any of the parts, changing the functions of any of the parts, combining or eliminating parts, and leaving out parts.

Alternate Use:

The invention can be used for anything other than its preferred use.

Limitations:

The invention will not work if there are any critical ranges of size, weight, pressure, etc. for any of the parts of the invention, or if some parts must be made of specific substances.

State of the Art:

Considerations for the state of the art include how the function of the invention is being done today, the closest device or method to the invention, something that performs the same function in a different way, any combination of existing devices or methods that would be similar to the invention, and how the invention performs its function differently or better than prior devices or methods.

Be sure to sign and date the form, and have it witnessed by someone who is not an inventor.
